Reflection Questions

Explain how you can use CSS and JavaScript in your Django web application.

You can use css and js in your django application the same as any other framework. All you need to do is ensure you have the proper link in your template to the proper css or js file respectively.

In your own words, explain the steps you'd need to take to deploy your Django web application.

I had to add some middleware for security, set debug to false, and deploy to heroku. There were a few issues being as Heroku did not support static loading, but I managed to get everything looking well enough

You've now finished Achievement 2 and, with it, the whole course! Take a moment to reflect on your learning:
What went well during this Achievement?
During this achievement I was able to truly understand the versatility there is in regards to programming languages and web design.

What's something you're proud of?

I'm really proud of my ability to execute this task. It gave me competence in my skills as a new web developer.

What was the most challenging aspect of this Achievement?
The most challenging thing was deployment. There are always new hiccups right before deployment

Did this Achievement meet your expectations? Did it give you the confidence to start working with your new Django skills?

Absolutely!
